### 3. DESCRIPTION OF TEST SAMPLE

The object of the assessment was the sample of pellets with the diameter of 6 mm, described by the customer as pellets made of post-production chemically uncontaminated sawdust. Sample number: ENplus A1, 6mm Jawor 27.11.2024-1.

The sample was taken by the customer and delivered to the laboratory of Łukasiewicz Research Network - Poznań Institute Of Technology on 28<sup>th</sup> November 2024.

Identification number:: A-4400/2024.

### 4. TEST RESULTS

Tests results are presented in Record No. 1/4400/2024.

### 5. ADDITIONAL INFORMATION

1. In the case of samples taken by the client, the Laboratory is not responsible for the identification and representativeness of the object, method and place of collection.
2. The expanded uncertainty was determined for coverage factor  $k = 2$  and 95% confidence level. The measurement uncertainty does not take into account the uncertainty component associated with the sampling.
